Welcome to our 2024 catalog. This year we are celebrating our 25th anniversary! When we started Beyond Play in 1999, our goal was simple: to offer an extensive and carefully curated selection of products for young children of all abilities, from infants and toddlers to children in the early elementary grades.

Twenty-five years later, we remain committed to this goal. We carry a wide selection of fun and educational products in all areas of child development, as well as products specifically designed for early intervention and special needs.

Our catalog is intended for therapists, teachers, and all other professionals who work with young children, as well as for parents and caregivers.

We hope that you will enjoy our 2024 catalog. Thank you for your valued business!

President

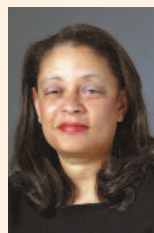

Meet our team of consultants

We are honored to have this dedicated group of professionals as our team of consultants. They have all been working with young children for many years, and are experienced in different areas of child development and special needs. They help us select the best products out of the hundreds of new products that we review each year. We are grateful for their contribution to our catalog.

sensory exploration

Sensory Mats

Set of 4 brightly colored sensory mats with 4 unique textures. Tactile surface provides sensory stimulation for hands and feet. Mats can be placed on the floor to work on balance and motor skills, or place the mats on a table to improve focus and encourage relaxation. Each mat is 8"D. From 5 years.

E658 Set of 4 Mats \$17.95

Sensory Tree House

Play tactile games of hide and seek with this group of cute hedgehog friends! The tree house opens up to reveal 5 hedgehogs, each with a unique texture on their back. As they play, kids can build essential sensory skills. Use the textures to differentiate between bumpy, smooth, and more, then hide the hedgehogs inside the tree house and find them by feel! Kids will also strengthen their shape, color, and number recognition skills along the way. Sized just right for little hands, the pieces are durable and easy to clean. When play time is done, store the hedgehogs inside the tree house for easy cleanup. The tree house measures 5"D x 6"H. Hedgehogs are 3"L. From 18 months.

Theo the Therapy Dog and Cloe the Comfort Cat

Theo and Chloe were designed for children with stress, anxiety, or sensory-processing issues, and for anyone who needs a comforting companion without the responsibility of caring for a live animal. They are just the right size for carrying along to the doctor's office, the dentist, over-night visitations, or any unfamiliar environment that can raise stress levels. Chloe and Theo can lay across your lap or shoulders, and even sit-up beside you. Each comes with a special pack in a hook-and-loop pouch in their tummy that emits a gentle lavender aroma to promote tranquility. The pouch can be cooled in the fridge or heated in the microwave for soothing temperatures. Their soft, cuddly body is weighted (2.5 lbs.) to add deep-pressure and help children feel secure as they hold them. The fur, paw-pads, ears, eyes and nose all provide unique textures for tactile exploration and to help promote mindfulness. Each is about 18"L.

Magna-Tiles®

Kids love Magna-Tiles®! These tiles were invented by an educator over 25 years ago to teach children about shapes through play. Each tile has magnets along its edges. The tiles easily connect on all sides for hours of open-ended play. Kids develop fine motor skills as they start by stacking, making flat patterns, 3-D shapes, and with time, create complex creations. Magna-Tiles hold children's interest and attention, build critical developmental skills, foster STEAM discovery, and promote imaginative play and creativity. Sized just right for kids and easy to use. They are used in schools, childcare centers, children's museums, and homes. Magna-Tiles are translucent and brightly colored, like stained glass! Use on a light table, with a flashlight, or build in the sunlight to create colorful reflections. Durable construction. Made with BPA-free plastic, phthalate-free, latex-free.

A Note about Using Deep Pressure and Weighted Products

Weight and deep pressure can be highly beneficial to some children with autism, sensory integration disorder, ADHD and other neurological disorders. The added weight or pressure may help the child calm down and better integrate sensory information. As a result, the child may become more organized, and improve in their ability to concentrate on play, learning or eating. Since there are great differences in how each child responds to weight and pressure, it is very important to use these products only under the supervision and guidance of a therapist familiar with sensory integration.

Fleece Weighted Blankets

Weighted blankets provide deep pressure and can create a calming effect for children with autism, sensory integration disorders and many other neurological challenges. The luxurious fleece fabric of these blankets is soft to the touch yet durable enough for everyday use. They are filled with plastic pellets that are evenly distributed in a quilted pattern into a 100% polyester fleece to prevent weight shifting. May be warmed in the dryer or cooled in the freezer for an extra soothing touch. Machine washable. Use with supervision for 20 minutes at a time or as recommended. Available in 3 sizes.

Deep Pressure Sensory Vest

This vest is designed to be pulled snug against the child's body, providing proprioceptive deep pressure feedback and stability. The smart design lets you adjust the fit to give smooth, even pressure across the shoulders, chest, and stomach for a full upper-body hug. Wearing the vest can increase child's body awareness, calm nerves, help promote attention and concentration, reduce fidgeting, and ease anxiety and tantrums. It can help develop proprioceptive integration and can decrease hyper-responsiveness, making it a great choice for children with autism spectrum disorder, integration dysfunction, attention-deficit disorder, and more.

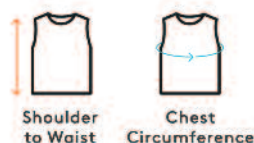

The vest is made of two separate pieces, front and back, that attach with wide strips of hook-and-loop fasteners. The fasteners on the shoulders and sides provide a wide range of adjustability, to suit a variety of body shapes. The adjustable fasteners are easy to move for tighter or looser feel. The location of the straps on the sides and shoulders, as opposed to other vests that adjust in the front, reduce the likelihood of accidental removal by the child, and works well with children who may become preoccupied with a front closure.

Made from durable, flexible neoprene that is breathable and helps wearer maintain a comfortable body temperature. It can be worn under or over clothing. Machine washable. Measure from shoulder to waist for length and around the chest for width. Colors vary by size.

Weighted Compression Vest

This weighted compression vest is designed to wrap children with sensory issues in a comforting hug. It can help relieve stress, anxiety, and overwhelming emotions caused by ADHD, autism, or other neurological challenges, so children can feel more focused, calm and relaxed around others.

The vests feature front and back pockets that let you customize the weighted feel by adding or removing the 1/2 or 1/4 lb. sand bags to support each child's individual needs. Soft, breathable, and supportive, these vests are designed to wrap comfortably over the shoulders and around the midsection and let kids move, play, and experience life with natural mobility while staying cool and relaxed on the go. You can use the compression feature of the vest by itself with the adjustable shoulder and midsection straps, and add weight as needed based on the child's particular sensory requirements. Machine washable (without weights). Measure from shoulder to waist for length and around the chest for width. Navy color. Use under adult supervision.

Sip-Tip Cup

The Sip-Tip makes drinking from a straw easier! Place the valve in the bottom of the straw and press down on the vent hole in the lid. The pressure pumps the liquid from the cup into the straw, and the valve keeps it there until the child drinks it. Children can drink with less effort and more control of the liquid flow. Easy to use! The 8 oz. cup is made of rigid plastic. The lid snaps on securely to prevent spills. The Sip-Tip Cup works with most drinking straws. The valve, cup and lid are dishwasher safe. Use with adult supervision.

Toddler Mini Utensils

The Mini Utensils were designed by a pediatric feeding specialist to help toddlers learn how to eat with a spoon (scooping) and fork (piercing). These utensils have many features that make them functional and developmentally appropriate for toddlers: The short, fat, round silicone handle makes grasping more successful. The narrow spoon bowl and fork prongs are made of strong nylon material for easy scooping and piercing, and safely fit toddler's mouth. Sensory bumps and raised rim provide sensory awareness. Bumps on the bottom of the utensil stabilize the spoon and fork when at rest. Both the silicone handles and strong nylon heads are BPA, BPS, PVC, phthalate and latex free. Dishwasher safe. Duo Spoon™

Children love the playful texture and friendly flexibility! Developed by Marsha Dunn Klein, the DuoSpoon™ is a creative oral-motor tool for children with sensory challenges. It's actually two tools in one: both ends of the DuoSpoon™ provide sensory variation. The sensation bumps on one end provide a bridge to texture acceptance. Once the child likes mouthing this end, tastes of food can be introduced. The child can be offered a favorite puree from a spoon which has the texture built in! The "speed bump" end provides a gentle wake up as the upper lip moves across the spoon bowl, and helps increase upper lip activity in food removal. Different food textures can further vary the child's experience with this end of the spoon. The DuoSpoon™ is made of FDA approved food-grade, very flexible, yet sturdy, silicone. Colors vary.

Mini Cup & Straw Training System

Designed by a pediatric feeding specialist, the Cup and Straw Training System teaches toddlers to drink from an open cup and safely learn to use a straw. Learning to drink from a straw is an important developmental milestone that develops lip rounding and promotes speech development.

- The straw is slightly curved, promoting lip and jaw closure for safe sipping. Sensory bumps around the top of the straw provide tactile awareness to activate lip rounding and decrease tongue suckling. Short straw length helps strengthen breath support and encourages nose breathing. Bringing the cup to the mouth is made easier with the non-slip silicone grip. Interior angle provides even flow for safe drinking. Weighted base and tactile bumps provide stability and sensory awareness to decrease spills. The rounded cup lid has sensory bumps that improve grip for removal.

- Cup and straw are made of 100% food grade silicone that is free of BPA, BPS, PVC, phthalates, lead and latex. Safe to use with cold and warm foods and liquids. Dishwasher safe. Cup is 3"H x 2.5"D, straw is 4"L. Cup holds 4oz. From 12 months.

Animal Tips for Z-Vibe

These cute critters are a must-have for your oral sensory motor treatment plan with the Z-Vibe.

Their charming and familiar faces captivate children's attention and increase their willingness to participate in therapy. The various shapes and textures provide lots of opportunities for mouthing, feeding, and sound production. Use

them to generate different sensations within the oral cavity and around the lips and face. The reverse sides have many additional textures and pockets for the tongue to explore. The backs also have bite blocks to work on jaw grading and stability. Use the ears to scoop foods on either a smooth or textured surface.

Constructed of medical grade materials that are FDA compliant and contain no PVC or latex. Mouse is 3"W. Each ear is about 1.25"W. Use with adult supervision.

Z-Vibe

The Z-Vibe is a vibrating tool for oral-motor stimulation and sensory input, designed by a speech-language pathologist. The gentle vibrations stimulate the gums, palate, and tongue. They can also be used outside the mouth on the cheeks and lips.

- Comes with textured plastic handle. The Z-Vibe and all tips are made of medical grade, FDA compliant materials that contain no lead, phthalates, PVC, BPA, or latex. About 3.5" long.
- You can connect to the Z-Vibe any of the tips shown. The tips screw into the handle and can be easily changed or replaced.
- You can use the Z-Vibe with one tip, as shown in the photo above, or as a double Z-Vibe simply by unscrewing the switch end, and connecting another tip instead. For example, attach the Probe tip to one end and a spoon tip to the other, so you can first "wake up the mouth" with the probe and quickly switch to feeding with the spoon.
- You can turn it off with the switch end, so there is no need to touch the tip that has just been in the child's mouth.
- The Z-Vibe comes with one **Probe Tip** (see below). Other tips are sold separately. The Z-Vibe takes a special battery which is not readily available in stores. We recommend buying spare ones. Use with adult supervision.

Tips for Z-Vibe

These tips are made of sturdy, medical grade material that is FDA approved and contains no latex. The **Probe Tip** has a different textured surface on each of its two sides. The **Preefer Tip** has a round end that is good for use when a rolling action is desired. The **Mini Tip** is a smaller version of the Probe Tip for smaller mouths. Use the **Spoon Tips** to provide oral stimulation during feeding, add vibration to feeding and "wake up" the mouth. The **Brush Tips** can be used as a transition to the eventual use of a regular toothbrush. The **Bite-n-Chew Tip XL** is long enough to reach the back molars for biting/chewing practice. The **Fine Tip** can be used to target specific spots within the oral cavity.

Y-Chew

This product encourages oral exploration and helps increase movement in the cheek, tongue, lips, and jaw. Use it to develop biting and chewing skills, to decrease oral sensitivities to textures, and to assist in the reduction of teeth grinding. The handle allows for an easy grip, and the extensions on the top part of the "Y" make it easy to reach the upper and lower back molar area. Each arm has a different texture: one smooth, one ribbed, and one with gentle bumps. The handle measures 2.5" and the extensions each measure 1". Constructed of medical grade materials that are FDA compliant and contain no PVC or latex.

Z-Grabber™

An innovative oral motor tool that combines the benefits of both the Z-Vibe® and the Grabber®. Enjoy all the versatility of the Z-Vibe and its interchangeable tips plus the added bonus of a chewable "Grabber" loop which is attached to the Z-Vibe's plastic handle. For individuals who crave vibration and sensory stimulation from the Z-Vibe, use the Z-Grabber to transition them into working on biting and chewing skills with the textured tip and chewable loop. For individuals who enjoy tactile input from the Grabber, use the Z-Grabber for added sensory input and to transition them into using the various tips of the Z-Vibe to work on speech and feeding skills. The loop can also be used as a handle for added convenience.

Includes one textured tip. Extra textured tips sold separately. Works also with all other Z-Vibe tips (see page 16). Battery is included (this is a special battery not sold in stores; we recommend purchasing a spare one). Made of medical grade, FDA compliant materials that do not contain any lead, phthalates, PVC, BPA, or latex. Measures 6" x 2". Use with adult supervision.

Teether-Heart Spoons

A playful version of a baby teether or a mouthing toy. Provides a comfortable texture, and an easy to hold handle. Stimulates the tongue, gums, lips and mouth palate with textured edges as the baby practices beginning mouth play and pre-chewing skills. The Teether-Heart also has a spoon side that can provide early, pre-spoon experiences as the baby brings the teether to the mouth to create varying positive independent experiences when learning to self-feed, explore tastes, or enhance a sensory oral feel. Crafted with high-quality, BPA free, food-grade safe silicone that are easier for small hands to grasp. Dishwasher safe. Designed for ages 4 months and up.

Baby Safe Feeder

No more wrapping food in gauze to practice chewing skills! This innovative product was designed by a father who almost lost his 9 month old son when he choked on a piece of teething biscuit. The Safe Feeder reduces the risk of choking when introducing pieces of food to children who are still practicing their chewing skills. Just put food in the feeder bag and screw the ring tight. The mesh bag will allow the child to enjoy chewing fresh food more safely. The Safe Feeder comes with one bag. Replacement bags are available. Mesh bags should be checked and replaced if there is any sign of wear. Washable in soap and water or in the dishwasher (top rack only).

Chewy Necklaces and Bracelets

These colorful chewy necklaces and bracelets provide a safe, wearable, and discreet solution for kids and adults who need to chew. Use this "chewelry" as an oral fidget (or even as a hand fidget) to help calm, soothe, and self-regulate during times of stress, or to better focus during homework and other activities. Each pendant is sold with its own adjustable breakaway necklace cord.

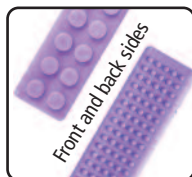

Important Safety Note: Chewy necklaces are not toys. The clasp and cord are not intended for chewing. Contains small parts that may pose a choking hazard - direct supervision required. Although these chew tools are sturdy and durable, wear/tear may be expected given the nature of the intended use. Replace if the item shows signs of wear and tear.

Krypto-Bite® & Brick-Stick® Chew Necklaces

Krypto-Bite is a prism-shaped pendant (3"L and 1/2"D) which is perfect for reaching the back molars. **Brick-Stick** has large bumps on one side and small bumps on the other for lots of varied sensory input! (2.5"L and 5/8"W). Both are medical grade, FDA compliant, no lead, phthalates, PVC, BPA, or latex. Each comes in three color-coded toughness levels: **Standard** - The softest level, recommended for mild chewers (those who do not chew through anything). **XT / Medium Firm** - This is the middle level. It's firmer, yet still fairly chewy, recommended for moderate chewers. The **XXT / Very Firm** is the toughest level. It still has some "chewability" to it, but it's pretty firm. No chew tool is indestructible, but this is usually the longest lasting level for avid chewers. From 5 years.

Grabbers

The Grabber, Grabber XT, and the Baby Grabber were developed by a speech-language pathologist to encourage jaw movement, tongue movement, and oral exploration. The handle is easy for little hands to hold and manipulate. Material and color are FDA compliant and contain no latex. **Grabber XT** is extra tough, for those individuals who need to exert lots of jaw pressure. It is constructed of a firmer material, but remains chewy and resilient. Both are 5"L.

The **Baby Grabber** is shorter (4"L), and was designed to calm and soothe infants who are in the developmental stages of mouthing. For infants with hypersensitivity, the Baby Grabber provides a positive oral experience. Use all Grabbers with adult supervision.

Chewy Tubes®

Chewy Tubes are a popular oral-motor device designed to provide a resilient, non-food, chewable surface for practicing biting and chewing skills. They can be used in treatment of individuals who are developing initial oral motor skills, or rehabilitating the jaw after surgery, trauma or stroke. Kids seeking additional proprioceptive input into the jaw may also like biting on Chewy Tubes.

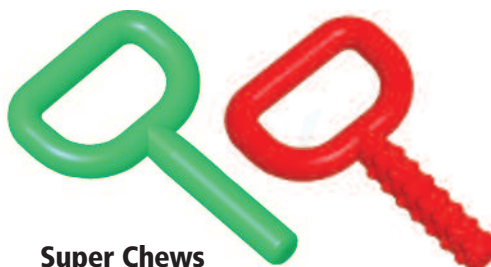

- The **Yellow** Chewy Tube has the narrowest stem size for chewing at 3/8" D.
- The **Red** Chewy Tube has a slightly wider stem size of 1/2" D.

- The **Green** Knobby Tube is a Chewy Tube with texture! The little bumps on the surface provide tactile stimulation for the mouth. The stem is 1/2" D.

- The **Blue** Chewy Tube is the largest and firmest of the Chewy Tubes. The stem diameter is 5/8" D.

- All Chewy Tubes are made of FDA approved material and colors, and are latex, lead and PVC free. Hand wash with mild soap. All are about 3" L. Use with adult supervision.

SpecialNeeds® Feeders

Invented by a mother of a child with a cleft palate, these unique feeders are suitable for children with oral/facial abnormalities and children with feeding and sucking problems. Special design features make them uniquely responsive to the baby's nursing efforts. The slit-valve in the nipple regulates milk flow from zero to maximum, depending on its orientation in the baby's mouth. This one-way valve prevents flooding or overwhelming the baby. The reservoir always remains full, so none of the baby's effort is wasted. If the baby needs a little help nursing, you can squeeze the reservoir and release a small amount of milk into the baby's mouth. The SpecialNeeds Feeders are not suitable for babies with swallowing difficulties.

Soft Feeder™

The Soft Feeder can be used whenever cup feeding is recommended for full-term and premature babies with feeding difficulties, or for breastfed babies for whom nipple confusion/preference is a concern. The Soft Feeder has a unique valve and self-filling reservoir system that provides more feeding control than traditional cups by maintaining the right amount of milk at the lip of the Feeder. The slightest feeding effort is rewarded, without flooding the baby. The Soft Feeder is made of soft, pliable pure silicone and is easy to fill and clean.

Grippies® Builders

Sensory and magnetic exploration for toddlers! This toddler STEM building toy system combines tactile exploration, magnetic play, and an introduction to the basic principles of engineering and geometry. Unique in concept and design, Grippies™ provide fun and safe, open-ended play for toddlers. This set of 30 pieces includes jumbo rods with 4 soft textures in bright colors, and balls that connect the rods together. Note that the magnetic force connecting the pieces is not as strong as in similar sets for older children. It was designed this way to make sure that toddlers will be able to pull the pieces apart. This makes Grippies also great for children with physical disabilities who cannot manipulate magnetic pieces that are stuck together too strongly. Spheres are about 2.75" D. Long rod is 4.5" L. Sandpaper Letters

Uppercase & Lowercase Set

Young learners will benefit from the important tactile experience of these letter cards. These durable cardboard cards are covered with fine sand and help students make the connection between the physical movement of forming letters and actual letter shapes. Each card has directional arrows to ensure proper formation. Includes 26 standard lowercase letters plus two alternative forms of l and t, and 26 standard upper case letters. Cards measure 4" x 3". From 3 years.

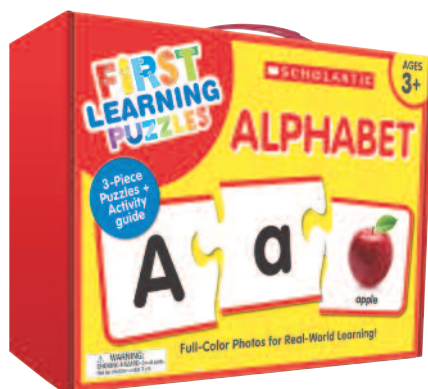

X741 \$34.95

Alphabet Box

Develop alphabet awareness and learn letter shapes and sounds. The Alphabet Box contains one uppercase and one lowercase letter card plus 3 object cards for each letter. Each object card has an illustration on one side and the lowercase letter on the reverse, enabling children to sort into groups and to self-check by turning the cards over. The base of the Alphabet Box also has printed letters for easy sorting and to help children put the cards back in the box. It can be used for a variety of phonemic awareness games. Includes 81 image cards and 54 letter cards, made of thick and sturdy cardboard. Sorting tray is made of plastic. Box measures 17" x 9". **△ SMALL PARTS, not for <3 years.**

L566 \$22.95

First Learning Puzzle - Alphabet

Two sets in one! This colorful set includes an activity guide and 26 self-checking, 3-piece puzzles designed to be used in two ways: as 2-piece puzzles and as 3-piece puzzles as children progress. The puzzles and activities are designed to help children recognize and name letters of the alphabet, match uppercase and lowercase letters, and identify letter sounds. Includes 26 3-piece puzzles (9" x 3"). **△ SMALL PARTS, not for <3 years.**

L283 Set of 26 Puzzles \$15.95

My First Bananagrams®

Perfect for the pre-reader and early learner, My First Bananagrams utilizes lowercase letters that help children grow a love for word games and wordplay, and aligns perfectly with reading curriculums. Can also be used for early literacy activities such as putting letters in alphabetical order or spelling children's names. Also included are combo-letter word building tiles, like "th" and "sh", which are the first step in word creation. With multiple mini games, My First Bananagrams creates a step-by-step play-progression towards ultimately learning to play a full game of Bananagrams. Includes 80 single letter tiles and 13 combo-letter tiles. For 1-4 players. From 4 years. **△ SMALL PARTS, not for <3 years.**

L316 \$16.95

Beginning Sounds Puzzles

A fun way to teach and reinforce beginning consonant letter sounds! The 20 self-checking, 5-piece puzzles in the set are designed to help children develop fluency with alphabet recognition skills. Each puzzle features a target letter at the center and 4 matching picture/word puzzle pieces. Each puzzle is unique, which makes self-correction a snap! Includes 10 two-sided, self-checking puzzles (20 puzzles in all). Full puzzles are 8" sq. **△ SMALL PARTS, not for <3 years.**

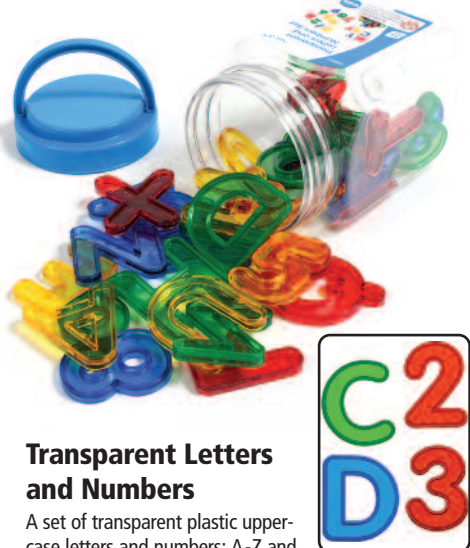

L660 Set of 20 Puzzles \$15.95

A to Z Magnatabs

A fun way to learn writing the letters of the alphabet! As you "write" over the lines with the magnetic stylus, beads are pulled up, making a pleasant "click" sound and creating dotted lines. Once you've "written" all the letters with the magnetic end of the stylus, trace them again with the other end or with your finger to "erase" them by pushing all the beads back down! The sensory reinforcement makes this a fun activity that kids want to repeat again and again. Boards are 12" x 9". Stylus is 4"L. See also the Numbers Magnatab on page 64. **△ SMALL PARTS, not for <3 yrs.**

Interactive Reading Books

Created by a special education teacher, these unique books are a wonderful way to use the power of visual strategies to teach children how to create sentences and expand their language use. Children also learn to associate pictures with written words and develop matching skills, picture identification, labeling, and reading skills. Each of the 8 books includes Velcro®-backed, movable pictures. The child matches each picture to its place in a sentence, or at a more basic level, the child matches each picture to its identical image. Drawings are colorful and attractive. The fun, interactive nature of these books is rewarding to children with or without special needs. Books are 8" x 5", laminated and bound by two rings. Each book includes 12 activity pages plus picture library pages. Laminated cards are 2" x 2". From 3 years.

Sensory Peanut Stability Ball

Featuring a dipped sitting saddle, this peanut shaped ball enables greater stability than a traditional ball chair. It provides deep pressure when used, which has a soothing effect and can relieve restlessness and improve concentration and behavior. Sitting, bouncing, and rocking on this ball improves balance, strengthens muscles, and helps develop core strength with the front-to-back and side-to-side movement. The small tactile bumps on the surface provide sensory input. Great for use in the classroom or at home. Made of an anti-burst and slip-resistant material. Includes a pump to inflate the ball, two stoppers, and a stopper remover. The chair holds up to 350 lbs and measures 36" x 20". From 3 years.

K455 \$54.95

Disc'O'Sit Junior

An inflatable, dynamic air cushion that mimics both the movement and shape of a therapy ball in any seat. It can also be used on the floor for balance and proprioception training as well as strengthening of the lower extremities. Smooth bumps on the surface provide a tactile experience for the child. Colors may vary. 13"D. From 3 years.

Soft Squeeze Seat

This seat is ideal for kids who have trouble sitting still, and for all children who need to decompress and relax. It will quickly become a kid's favorite place to calm down. The gentle squeezing hug of this seat applies soothing pressure and compression, creating a comforting environment and resulting in greater concentration and focus at home or at school. Kids can use this versatile seat in many different ways. Rock back and forth by sitting across the seat like a rocking horse, unwind with both feet on the same side, or lay on it as a support while reading and resting. Made of high quality polyurethane foam and thick heavy-duty vinyl. Very easy to clean! Measuring 28" x 9" x 26", the Soft Squeeze Seat is designed for children aged 3-9 years with a maximum weight of 100 lbs.

K302 \$259.95

Movin' Sit Jr.

An inflatable, dynamic air cushion which activates intrinsic trunk muscles to support the spine. The wedge shape encourages proper posture and alignment while sitting. It can also be used on the floor or in chairs as a back support. Great for children who can benefit from dynamic sitting activity combined with the stability of a wedge. Can easily be inflated by mouth and carried by the built in handle. 10" x 10". From 3 years.
